

Crop Post Harvest Handling

C 10.0

EN-QS-F-181-10 Rev. E, 2023.11.09

Page 1 of 5

Operator #: 2487

Operation Name: Randy & Whilden Hughes

Date: 02/01/2024

Use this Crop Post-Harvest Handling section to describe the activities to be included in your crop production certification. This form is intended for use by operations that handle only their own product and whose activities preserve the essential form of the product, such as washing, packing, cooling and storing produce, drying grain, bulk screenings, and seed cleaning or preparing raw agricultural product for market or farm use.

Use Handler OSP forms if you handle crops or multiple-ingredient products not produced on your farm, seed cleaning or screenings bagged for retail market, or if your activities include complex handling activities, such as cooking, baking, curing, churning, separating, distilling, extracting, manufacturing, canning, etc.

A. General Information

1. Please describe how crops are handled post-harvest, explaining where and how product is received, processed, packaged, and stored. Please ensure to include all equipment utilized, processes that occur, and storage areas used.

We have two 3700 bushel cone bottom bins on farm and we occasionally rent extra storage from a good neighbor, Josh Tracey. Grain is elevated directly from the field via bulk truck and belt.

2. Indicate which post-harvest handling activities are occurring:

- | | |
|--|--|
| ☐ Grain/seed cleaning | ☐ Washing/cleaning of product |
| ☐ Husking | ☐ Shelling |
| ☐ Sorting/Sizing | ☐ Packaging |
| ☐ Cooling | ☒ Storing |
| ☐ Grade product | ☒ Drying |
| ☐ Dehulling | ☐ Grinding |
| ☐ Milling | ☐ Tagging/Banding |
| ☐ other (specify): | |

B. Grain/Seed Cleaning

☒ Not Applicable

1. Indicate how grain cleaning is occurring:

☐ On-Farm Cleaning

☐ Off-Farm Cleaning

Name of off-farm cleaner:

Certified Organic?

☐ YES ☐ NO

☐ Mobile Cleaner

Name of mobile cleaner:

Certified Organic?

☐ YES ☐ NO

Note: If mobile cleaner is not certified organic, operation must ensure the cleaning occurs on-farm and clean-out records are maintained. These records will be reviewed at inspection.

2. If on-farm cleaning, is either the post-harvest area or equipment used for both organic and non-organic products?

☐ YES ☐ NO

If **YES**, describe measures taken to prevent commingling and contamination and the documentation that is maintained.

C. Cleaning and Sanitation

☒ Not Applicable

1. Describe how you clean your post harvest handling area including any food contact surfaces.

2. List all cleaning materials you use or plan to use in your Materials List (C 11.0).

☐ Listed

3. If you have a Standard Sanitation Operating Procedure (SSOP), you may attach a copy of the portion that covers equipment and organic food contact surfaces.

☐ Attached

D. Water Use

☒ Not Applicable

1. Do you use water to clean crops or food contact surfaces?

☐ YES ☐ NO

If **NO**, skip to section E (Facility Pest Management).

2. Identify water source and indicate how it is used.

3. Do you add chlorine to wash water, dump tank, flume or other water that has direct food contact? ☐ YES ☐ NO

4. Do you add any other material(s) to the water? ☐ YES ☐ NO

If **YES**, list materials in your Materials List (C 11.0).

5. If you add chlorine to water that directly contacts organic products, indicate how you meet the following restriction: residual chlorine levels in water that contacts organic products directly may not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 ppm) at the point where the water last contacts the organic product.

☐ Not applicable, no chlorine added ☐ Final rinse with water only ☐ Final rinse with chlorine at or below 4ppm

E. Facility Pest Management

☐ Not Applicable

1. List recurrent or potential pest problems, including flying or crawling insects, rodents, birds, etc.

Cone bottom bins completely clean out. when empty that are inspected for signs of pest or rodent damage. Man holes and vents are checks to ensure they stay sealed.

2. Describe the strategies you use or plan to use to prevent, manage or minimize pest problems in your handling facilities (wherever washing, packing, grading, cleaning, cooling and/or storage occurs).

We have plumbed a waterline to the top of the bins. When they are empty we can completely wash the interiors of the bin.

3. When and how do you monitor for pests in storage and handling areas?

Visual inspection on a semi regular occurrence. When loading and unloading and when checking moisture/temperature. Through sight holes when possible.

**4. What pest management and monitoring records do you keep?**

MGMT and records for facility held by fisher pest control. They visually inspect the interior and exterior of the entire facility and make adjustments to our pest control strategies. Bait traps etc make no contact with any vessel or machine involed with handling grain.

F. Packaging☒ Not Applicable; bulk sales (no packaging)**1. Check types of packaging material used:**

- | | | |
|---|--|---|
| ☐ metal | ☐ synthetic fiber | ☐ natural fiber |
| ☐ paper | ☐ foil | ☐ tote sacks (plastic line or unlined) |
| ☐ cardboard | ☐ plastic | ☐ PVC plastics |
| ☐ wood | ☐ waxed paper | ☐ glass |
| ☐ other (describe): <input type="text"/> | | |

2. If the product is to be sold as food product (i.e. food-grade soybeans), is packaging documented as food-grade?☐ YES ☐ NO**3. OCIA Standards** – Are non-essential packaging materials avoided?☐ YES ☐ NO**4. In what form are finished products shipped?****5. Has packaging been treated with any substance?**☐ YES ☐ NO

If YES, what are they?

6. List the capacity (i.e., volume) of the final packaging (e.g., 69 kg, 21,000kg, 25 lbs, etc):
