Standards and regulations require that organic production areas have distinct boundaries and buffer zones to prevent the unintended application of a prohibited substance or contact with a prohibited substance that is applied to adjoining land not under organic management. Adjoining land includes crop land, pastures, residential property, fallow land, etc. Buffer areas may change annually, depending on contamination potential from adjoining land uses. Crops within the required buffer zone must be left unharvested or harvested, stored, and disposed of as non-certified crop, with records kept of crop disposition. Please be sure to identify all buffer areas on field maps.

1. Are you familiar with the uses of the land adjoining your organic fields and do you watch for potential problems?

☒ YES ☐ NO

2. What types of buffer zones (crop, tree lines, grass strips, etc.) do you maintain around your organic fields?

☐ Not Applicable

Crop, tree line, grass ditches, roads, and harvested buffer rows.

3. What is the width of the buffers?

☐ Not Applicable

at least 25 ft
