Operation Name: Randy & Whilden Hughes

Date: 05/21/2025

A. Manure

If raw or aged manure is used, it must be used in accordance to the applicable organic program. Each organic program has different requirements concerning the use of raw manure.

1. Do you apply uncomposted animal manure?

☒ Yes. **Complete 2-7 below.** ☐ No. **Skip to Section B.**

2. What is the source of the manure?

☐ On-farm organic livestock ☐ Off-farm from organic livestock
☐ On-farm conventional livestock ☒ Off-farm from conventional livestock

3. If on-farm manure is applied, please indicate the type of livestock operation: ☒ N/A, no on-farm manure is applied

☐ Dairy ☐ Chicken confinement
☐ Hog confinement ☐ Feed lot
☐ Pastured Livestock ☐ Other (explain):

4. What form(s) of manure do you use?

☒ liquid ☒ piled ☒ semi-solid ☒ pelleted ☐ other (specify):

5. What types of crops do you grow (check all that apply)?

☒ crops not used for human consumption
☒ crops for human consumption whose edible portion has direct contact with the soil
☒ crops for human consumption whose edible portion does not have direct contact with the soil

If you grow crops for human consumption and use raw manure, you must ensure that the dates of manure applications (including livestock grazing dates, if applicable) are clearly documented on field histories or in other records.

6. For on-farm manure, list all ingredients/additives, or materials that is applied to manure or bedding. This would include hay, straw, woodchips/shavings, cornstalks, pit additives, lime, odor suppressants, minerals from foot baths, etc. for the manure that is used.

Oat or barley straw, soybean stubble, sand

Compost and Manure

7. If manure is sourced off-farm, attach additive specifications (if applicable), along with a statement from the supplier verifying that no prohibited substances were applied to the manure or around the pile.

8. What precautions do you take to ensure water, soil or crops are not contaminated by manure runoff?

liquid manure is always knifed in, incorporated, and we plant a cover/catch crop.

Litter and liquid manure are never spread on frozen ground and immediately incorporated

piled manure is applied when ground is firm, but never frozen or covered in snow.

Pelleted manure is side dressed to spoon feed crops

B. Compost

If composted material is used as part of the fertility program, it must be produced according to organic standards if it is to be applied as actual "compost" and not as raw manure.

1. Check all that apply and answer the corresponding questions as noted.

- ☐ No compost used.
- ☐ I produce compost that does not contain manure. **Complete questions 3 and 4.**
- ☐ I produce compost that contains manure. **Complete questions 2-4.**
- ☐ I purchase compost that does not contain manure. **Complete question 4.**
- ☒ I purchase compost that contains manure. **Complete question 4.**

2. Describe your composting methods including temperatures reached, timelines for production, whether in-vessel, static pile, or windrow, and aeration methods.

3. List all compost ingredients/additives.

4. List compost in your Materials List (C 11.0). If produced on-farm indicate "on-farm" as the manufacturer.
