4. Describe how and when you monitor the effectiveness of your pest management program, and whether you keep any monitoring records. Please have all records available for inspection.

we are generally able to control pests with good rotations, If we began to see heavier pest pressure we might consider using something like pyganic. SPE-120, although used as an immunity booster for plant health, has the auxiliary benefit of controlling insect populations that predate on the plants.

5. Do you burn crop residues?

☐ YES ☒ NO

If **YES**, describe the crop, purpose, location and timing.
